GLEIF 2015

Meet The Market Event | London, UK | 2015-01-29

Following the 2008 financial crisis, the importance and benefit of a universal Legal Entity Identifier (LEI) became clear. Regulators worldwide acknowledged their inability to identify parties to transactions across markets, products and regions. This hindered the ability to evaluate systemic and emerging risk, to identify trends, and to take corrective steps.

Recognizing this gap, authorities, working with the private sector, have developed the framework of a Global LEI System (GLEIS) that will, through the issuance of unique LEIs, unambiguously identify entities engaged in financial transactions.
